

Paradise Foam®

Paradise Foam® is a high performance absorber designed to reduce reverberation in an enclosure.

These fiber-free, anti-microbial flat panels are a practical solution for absorbing noise that travels freely in HVAC ductwork.

Paradise Foam® is an economic and easy solution to reducing echo within a room when placed behind canvas artwork.

Sizes and Colors:

Paradise Foam® is available in white, grey or black. Standard sheets are 2'x4'x1". Custom sizes, thicknesses and colors are available upon request.

Applications:

- HVAC ducts
- Jacuzzi on an upper floor
- Noisy Rooms
- Music Rooms

Installation:

Panels can be easily cut to fit any size job and can simply be compressed to fit into many areas. Special adhesive glues can be applied if required.

Fire Rating:

UL code 94, electronics:	HBF: Passes
	HF1: Passes
	VO: Passes
ASTM E 84 Class 1	Flame spread: 5
Comparable to UL 723, ANSI/NFPA No. 255, and UBC No. 8-1	Smoke Density: 45
ASTM 1000.001 (Toxicity Requirements for Smoke Gasses)	pass
ASTM 662-83 (Specific Optical Density of Smoke Generated by Solid Material)	pass
ASTM E 162-83	Flame spread index: 22.9
(Surface Flammability of Materials Using a Radiant Head	Flame spread factor: 6.7
Energy Source)	Heat evolution factor: 3.5

Acoustical Properties:

	NRC
