

ABSORBER

Lumitex®

SoundSense's **Lumitex®** is a lightweight, breathable, non-woven fabric which provides excellent acoustic absorption while requiring a fraction of the space of traditional absorptive panels.

Lumitex® is washable, and can be dyed, printed, cut and sewn as with traditional fabrics to suit your decorative needs. **Lumitex®** features non-fraying edges and may be used as an underlayment, or incorporated into curtains and drapery. The translucent property of the fabric allows it to be backlit in any color for a pleasing visual effect.

Applications

- Restaurants
- Conference Rooms
- Offices
- Museums

Technical Properties:

Form:	Fabric, non-woven
Light Transmission:	Medium
ISO Classification	ISO 9001, ISO 14001
